# 2022-2023 ACADEMIC YEAR (SUMMER TERM)

## **ERASMUS + SUMMER TERM APPLICATION ANNOUNCEMENT**

# WHAT IS STUDENT MOBILITY FOR TRAINEESHIPS?

This mobility activity is an internship opportunity at an overseas organization for a student registered at a higher education institution. An "Internship" is a process where a beneficiary receives professional training and/or gains work experience at a foundation or organization in another country participating in the program.

The internship activity cannot be used for studies, such as research or analysis related to academic studies, within the scope of a certain curriculum.

The internship is for a student to gain practical work experience in the vocational training area that they study.

The internship activity is not expected to be compulsory for the student's diploma program. However, the economic sector for the internship should be related to the current vocational education program of the student.

Studies, scientific research and projects that the students carry out to complete or support their own scientific studies are not considered internship activity. For these activities to be considered as an internship, they must be performed as professional activities with an economic equivalence in the relevant sector, not as part of academic studies.

In the post-graduation internship activity, the application must be made before the student graduates (when he/she is currently an associate, undergraduate or graduate student).

Graduated students can not apply for the mobility. Internship mobility after graduation must be completed within 12 months of graduation.

Students who froze their registration cannot benefit from the mobility.

# **Eligible Places for Internship**

If the internship foundation is closed due to holiday during Mobility for Traineeships, the internship might be interrupted. Grants will be given for the period when the foundation is closed. # **GRANT SUPPORT**

Grants are given to students to help them with the additional costs incurred during their stay abroad.

Grants are only contributions, not to cover the student's full costs of the activity.

The countries where student mobility activities can be carried out were divided into 3 groups according to their standard of living and monthly learning and internship grants were determined for the country groups

The groups of countries and the amount of grants to be given to the students going to these countries are given in the table below:

<sup>\*\*</sup>If students who did not take the Foreign Language Exam following the application without any force majeure reapply to any mobility activity within the scope of higher education, "5 points" will be deducted from their weighted selection scores.

Students can participate in activities without grant. Students without grant are also subject to general evaluation along with other applicants and go through the same process as the students with grant. The difference of the student without grant is that the student is not included in the budget calculations and is not paid.
